Trommel Screen Machine: Revolutionizing Waste Sorting Efficiency - DCC Group

DCC Group’s trommel screen machine revolutionizes waste sorting with efficient trommel screen technology. The waste trommel and mobile trommel sort recyclables, organics, and RDF from municipal and C&D waste, boosting Trommel efficiency. With customizable screen sizes and high-throughput designs, DCC’s machines reduce landfill use and enhance resource recovery. Supporting India’s circular economy and Swachh Bharat Mission, their robust trommel screen solutions ensure sustainable waste management, transforming urban waste into valuable resources with precision and reliability.
